

Corporate Fact Sheet

Green Packet Berhad is a public company listed on the Main Board of Bursa Malaysia Securities Berhad. We are a leading global developer of next generation mobile broadband networking solutions. Our mission is to provide a seamless and converged platform for the delivery of user centric multimedia communication and services regardless of the nature and availability of the backbone infrastructure.

The MSC-status (Multimedia Super Corridor) company offers an extensive range of flexible and scalable solutions for carriers, mobile enterprises and mobile workgroups through a technology that is integral and critical to the entire wireless value chain. Its businesses can be categorized into the following products/solutions:

SONaccess is designed to enable fixed-mobile convergence, WLAN-cellular integration and secure seamless roaming across multiple networks. Its primary feature is the concurrent delivery of all media types – voice, data and video – to an easy-to-use graphical user interface, independent of location and type of networks.

SONbuddy is a software that turns each Wi-Fi device into an intelligent router so that they automatically organize a multi-hop self-healing network without the need for an access point or other wireless infrastructure. All the users within this Self Organizing Network ("SON") can communicate and collaborate with each other using the built-in applications like VoIP, Instant Messaging, File Exchange and Screen Sharing.

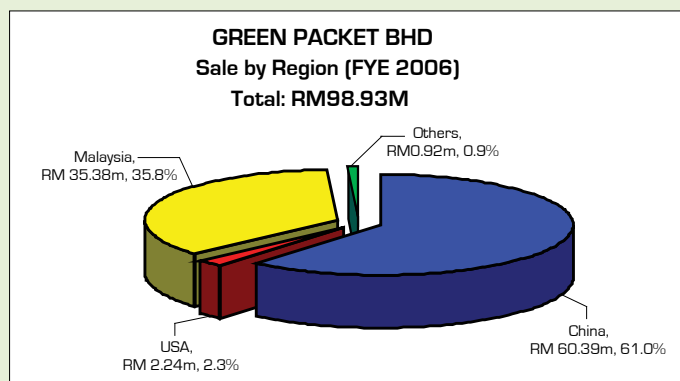

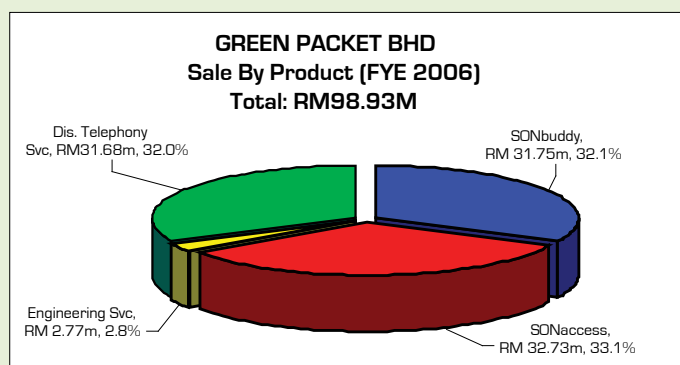

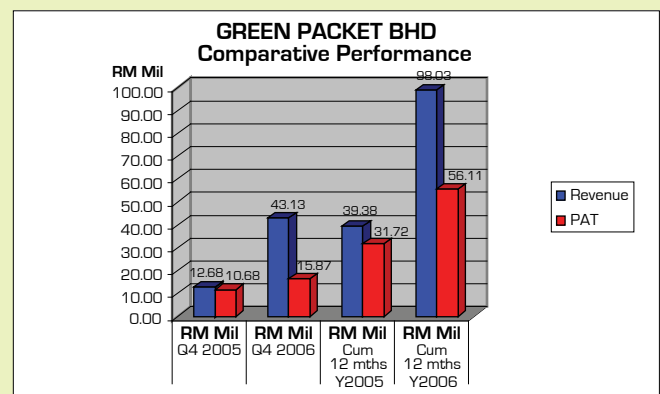

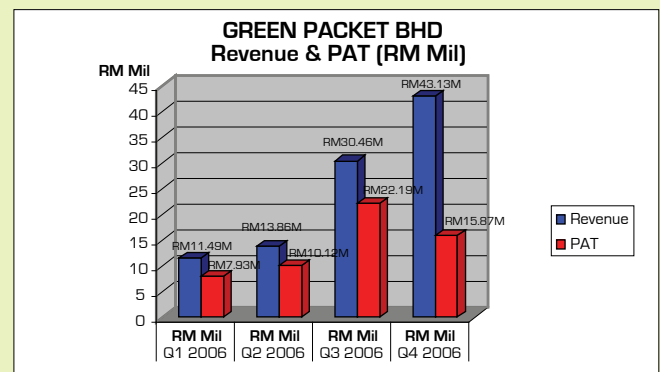

SONmetro designed for metropolitan coverage, is an innovative mesh-network solution over Wi-Fi that provides the ultimate wireless broadband experience using Opportunity Driven Multiple Access (ODMA) technology that adapts to available transmission opportunities. This enables the provision of wireless broadband connectivity at GSM type coverage with DSL/Cable data speeds at a cost relatively lower than most wireless solutions.

Green Packet has replicated its successful business model in other regions. Currently it has offices in China, Taiwan, Singapore, US, Australia, Bahrain and Malaysia.
